Education

Aditya University, B.Tech in AIML

Sept 2023 – Present

GPA: 8.89/10.0

Jawaharlal Navodaya Vidyalaya, Intermediate (M.P.C)

May 2021 – May 2023

GPA: 8.8/10.0

Experience

Machine Learning Intern, OneStop.ai – Hyderabad, Telangana

May 2025 – June 2025

- Developed and trained machine learning models to predict diabetes risk using patient health data such as glucose levels, BMI, and age.
- Performed data preprocessing, cleaning, and feature engineering to improve model performance and reliability.
- Evaluated multiple algorithms and optimized hyperparameters to achieve a prediction accuracy of 85
- Implemented model evaluation using metrics such as accuracy, precision, recall, and confusion matrix.
- Worked with Python, Pandas, NumPy, and Scikit-learn in Google Colab to build and test the end-to-end ML pipeline.

Projects

PaymentGateway-AsyncArchitecture

[| GitHub](#)

Tools: Node.js, PostgreSQL, redis, Docker

- Architected an asynchronous payment backend with webhook handling, idempotency keys, and transaction logging.
- Implemented retry logic, dead-letter queues, and idempotent payment flows for reliable transaction processing.
- Built RESTful APIs with Express.js and integrated PostgreSQL for persistent storage with Prisma ORM.

Real-Time Auction Platform

[| GitHub](#)

Tools: Node.js, Express.js, PostgreSQL, Docker

- Built a real-time auction platform using microservices architecture with services for authentication, auctions, bidding, and notifications.
- Designed an event-driven system using RabbitMQ for bid processing and inter-service communication.
- Implemented WebSocket-based real-time bidding with JWT authentication and room-based event broadcasting.
- Developed a secure API Gateway with route proxying, authentication middleware, and WebSocket upgrade handling.
- Containerized the entire system using Docker and docker-compose with health checks, service orchestration, and PostgreSQL databases.

Achievements / Certifications

- Earned Certification on Introduction to AI from NPTEL.
- Solved 400+ DSA problems and competed in contests on platforms like CodeChef.

Technologies

Programming languages: C++, Python, SQL

Web Technologies: HTML, CSS, Javascript, Bootstrap, REST APIs, Full-Stack Development

Frameworks and Libraries: Node.js, Express.js, React.js

Databases and Tools: PostgreSQL, MySQL, Git, GitHub, Docker, Google Colab

Data and Machine Learning: Pandas, NumPy, Scikit-learn, Data Preprocessing, Model Evaluation
